

## INACTIVE Eastern Atlantic Ocean tuna - pole &amp; line

## Overview

## FIP Description

The Senegal Pole and Line Tuna FIP targets skipjack (*Katsuwonus pelamis*), yellowfin (*Thunnus albacares*) and bigeye tuna (*Thunnus obesus*) in the Atlantic Ocean. The expected unit of certification is skipjack, yellowfin and bigeye tuna fished in the Eastern Atlantic Ocean from pole-and-line vessels based in Dakar, Senegal and selling to Thai Union Europe through SENEMER, Princes Tuna Mauritius and other EU processors.

## How is this FIP Doing?

## Current Status:

**Actions Progress** This shows the proportion of actions in the workplan that the FIP has completed.

**Actions Overview** This shows the proportion of actions that are behind schedule, on track, completed, or not yet started.

Behind	On Track	Complete	Future
75%	0%	25%	0%

**Red Indicator Progress** This shows the proportion of actions specifically addressing red indicators that are behind schedule, on track, completed, or not yet started. This helps users understand the progress the FIP is making on the biggest challenges in the fishery.

Behind	On Track	Complete	Future
100%	0%	0%	0%

### FIP Objective(s)

- Achieve sustainable stock status' for tuna species that is consistent with the Maximum Sustainable Yield (MSY) and management systems strengthened to achieve this.
- To improve the availability of accurate data on catches, retained and especially bycatch by strengthening information systems and training.
- To collaborate with other institutions working on tuna fisheries issues in the country, including working together to improve the management and policy towards sustainable fisheries for example Harvest Control Rules.
- Promote the adoption by the International Commission for the Conservation of Atlantic Tunas (ICCAT) of management measures that will reduce fishing mortality.
- Strengthen ETP and retained species management strategies and reduce bycatch.
- Improve governance and decision-making process.
- To achieve a certifiable status by 2024. All objectives are by 2024.

### FIP Type

Comprehensive

### FIP Stage

Stage 5: Improvements on the Water

### Start and Projected End Dates

July, 2019 -  
December, 2024

### Species

#### Common Name

Bigeye Tuna

#### Scientific Name

Thunnus obesus
