

COMPLETED Russia West Bering Sea pollock - midwater trawl

Overview

FIP Description

The FIP is led by Pollock Catchers Association which represents 26 Russian fishing companies which harvest Alaska (Walleye) Pollock in the West Bering Sea Zone. Self-analysis made with OSMI Rapid Assessment Tool has revealed some areas where certain improvements may be needed to achieve an unconditional pass. To address that, the Pollock Catchers Association has designed a 3 year workplan that specifies specific actions aimed at making or initiating improvements. Improvements include collecting additional information about fishery's impact on certain elements of the ecosystem and preparation scientific information on MSC performance indicators needed for the assessment. Improvement actions were initiated in May 2019.

How is this FIP Doing?

Current Status:

% of Indicators Tracked Basic FIPs may focus their workplans on a subset of the indicators. This shows the proportion of total indicators the FIP is working on.

Actions Progress This shows the proportion of actions in the workplan that the FIP has completed.

Actions Overview This shows the proportion of actions that are behind schedule, on track, completed, or not yet started.

FIP Objective(s)

The Russia West Bering Sea pollock - midwater trawl FIP has a goal to enter MSC full assessment by Sept 2024 in order to achieve MSC certification.

FIP Type

Basic

FIP Stage

Stage 5: Improvements on the Water

Start and Projected End Dates

September, 2019 -
September, 2024

Species

Common Name

Alaska Pollock

Scientific Name

Theragra chalcogramma

Gear Type

[Midwater Trawl](#)

Location

FAO Major Fishing Area

[Area 61 \(Pacific, Northwest\)](#)

Exclusive Economic Zones

Country

Russian Federation (the)

Geographic Scope

West Bering Sea Zone (to the east from 174')

Country Flag of Vessel

Russian Federation (the)

Estimated Total FIP Landings

192000 metric tons

FIP Leads**Organization Name**

Pollock Catchers Association

Organization Type
