

Indonesia Indian Ocean tuna - longline

Overview

FIP Description

The Indian Ocean longline tuna FIP was initiated by Sustainable Fisheries Partnership, who conducted two informal Indonesia tuna roundtable meetings in April 2010 and September 2011. Both meetings were attended by the Indonesian longline fishing industries, the Indonesian Tuna Longline Association, the Indonesian Tuna Association and staff from the Ministry of Marine Affairs and Fisheries.

Until 2015, there were 28 longline vessels participating in this FIP. And currently, there are only 10 vessels in this FIP, as a result the moratorium on operations by foreign manufactured fishing vessels.

How is this FIP Doing?

Current Status:

% of Indicators Tracked Basic FIPs may focus their workplans on a subset of the indicators. This shows the proportion of total indicators the FIP is working on.

Actions Progress This shows the proportion of actions in the workplan that the FIP has completed.

Actions Overview This shows the proportion of actions that are behind schedule, on track, completed, or not yet started.

100%

0%

0%

Red Indicator Progress This shows the proportion of actions specifically addressing red indicators that are behind schedule, on track, completed, or not yet started. This helps users understand the progress the FIP is making on the biggest challenges in the fishery.

Behind	On Track	Complete	Future
0%	100%	0%	0%

FIP Progress Rating

B - Good Progress

FIP Objective(s)

1. To implement traceability programs to increase transparency and to ensure that the origins and status of tuna, swordfish, mahi, opah and oilfish (escolar) products purchased are well-known and all coming from legal fisheries by 2020.
2. To improve the availability of accurate data on catches, retained and bycatch by 2022.
3. To continue with the observer onboard by hosting 4 observers by 2019
