

INACTIVE Lower Mekong Delta Kien Giang multispecies - trawl

Overview

FIP Description

NOTE: This FIP is inactive.

Currently, Kien Giang is the most important marine capture fishery in Vietnam, the trawl fishery particularly plays a crucial role in terms of number of vessels as well as in annual catch volume. On average, this fishery accounts for more than 80% of landing volume and provides a large number of livelihoods to local and neighboring provinces.

However, the fishery is being faced with a number of issues related to management (monitoring, control, surveillance), particularly recruitment overfishing, growth overfishing, social issues (increasing conflicts among fishing fleets, poor management of labor force). There is an urgent need for solutions which promote good practices in managing and operating the fishery while the central and local government are implementing "top-down" approaches in fisheries management. Forming an alliance within actors along the supply chain should strengthen the participation of all relevant stakeholders in management plan development and implementation.

The FIP is focusing on the three main areas including (1) fishery resource and environment; (2) fishery economics and (3) social aspects. The objective of this multi species FIP is to achieve the Global Standard for Responsible Supply of fishmeal and fish oil (IFFO RS).

How is this FIP Doing?

Current Status:

FIP Objective(s)

- To ensure sustainability of the seafood (surimi and other products) and fishmeal sourced from the trawl fishery in Kien Giang province, Vietnam by 2022.
- To develop a pilot model of seafood/fishery product supply chains or coalition/alliance in seafood supply chain to address current issues faced by the fishery by 2022.
- To achieve responsible fishmeal that meets requirements of the third parties/certified bodies for aquaculture feed (IFFO RS, BAP, ASC) by 2022.

Basic

FIP Stage

Stage 3: FIP Implementation

Start and Projected End Dates

June, 2013 -

June, 2022

Species

Common Name

Northern Anchovy

Scientific Name

Stolephorus spp.

Common Name

Blackspotted Croaker

Scientific Name

Pennahia spp.

Common Name

Big-eye Scad

Scientific Name

Selar crumenophthalmus

Common Name

Spanish Mackerel

Scientific Name

Scomberomorus commerson

Common Name

Black Grouper

Scientific Name

Lutjanus spp.

Common Name

Indian Squid

Scientific Name

Loligo chinensis

Common Name

Common Octopus

Scientific Name

Octopus spp.

Common Name

Pink Shrimp (Gulf)

Scientific Name

Panaeus spp.

Common Name

Red Mullet

Scientific Name

Parupeneus spp.
