

INACTIVE Eastern Pacific large pelagics - longline (Martec)

Overview

FIP Description

The Eastern Pacific Longline Large Pelagics FIP (Martec) fishery targets yellowfin tuna (*Thunnus albacares*) and mahi mahi (*Coryphaena hippurus*) both in Costa Rica, Ecuador and Panama as well as swordfish (*Xiphias gladius*) exclusively in Costa Rica. The 250 longline vessels are flagged to Costa Rica and Panama and fish on the high seas and within both countries' EEZs. The fishery is locally managed by the Costa Rican Institute of Fisheries and Aquaculture (INCOPESCA) and the Panama Aquatic Resources Authority (ARAP) and regionally by the Inter-American Tropical Tuna Commission (IATTC).

How is this FIP Doing?

Current Status:

Actions Progress This shows the proportion of actions in the workplan that the FIP has completed.

Actions Overview This shows the proportion of actions that are behind schedule, on track, completed, or not yet started.

Behind	On Track	Complete	Future
6%	50%	44%	0%

Red Indicator Progress This shows the proportion of actions specifically addressing red indicators that are behind schedule, on track, completed, or not yet started. This helps users understand the progress the FIP is making on the biggest challenges in the fishery.

Behind	On Track	Complete	Future
0%	100%	0%	0%

FIP Objective(s)

- *Sustainable Fish Stocks* – To ensure tuna, swordfish, and mahi mahi catches across the Eastern Pacific Ocean do not exceed sustainable levels
- *Minimising Environmental Impacts* – To ensure we are not having a negative impact on primary, secondary and ETP species
- *Effective Management* – To strengthen governance systems in Flag States, RFMO and the Eastern Pacific Longline Large Pelagics (Martec) fishery

Overall we aim to meet an unconditional pass of the MSC Standard by November 2025.
