

Vietnam blue swimming crab - bottom gillnet/pot/trap

Overview

FIP Description

The Kien Giang blue swimming crab (BSC) fishery catches BSC off the coast of Kien Giang Province using bottom gillnets and traps. The fishery supports the livelihoods of an estimated 20,000 fishers and their families. The blue swimming crab is also an important export product for Vietnam. Yet there are critical issues facing this fishery, including the harvest of undersized crab and gravid females, a lack of sound knowledge of the health of the stock, and lack of enforcement capacity. Through the active involvement of FIP stakeholders, such as the Department of Agriculture and Resource Development (DARD), Research Institute Fisheries Management and Provincial Peoples Committee, and FIP participants, the sustainability challenges facing this fishery are being addressed.

How is this FIP Doing?

Current Status:

Actions Progress This shows the proportion of actions in the workplan that the FIP has completed.

Actions Overview This shows the proportion of actions that are behind schedule, on track, completed, or not yet started.

Behind	On Track	Complete	Future
32%	56%	12%	0%

Red Indicator Progress This shows the proportion of actions specifically addressing red indicators that are behind schedule, on track, completed, or not yet started. This helps users understand the progress the FIP is making on the biggest challenges in the fishery.

Behind	On Track	Complete	Future
35%	55%	10%	0%

FIP Objective(s)

The FIP is working towards a fishery performance level that can achieve passing scores against the Marine Stewardship Council Fisheries Standard by December 2028 by addressing a number of environmental challenges. These include: development and implementation of a sustainable harvest strategy that includes appropriate harvest controls, regular stock assessment, improved monitoring of the stock, minimizing catches of ETP species such as vulnerable shark species, implementation of a Kien Giang crab management plan, maintaining an operational Crab Council, responsive decision making, promulgation of effective fisheries laws, review of management performance, and improved compliance and enforcement.

FIP Type

Comprehensive

FIP Stage

Stage 3: FIP Implementation

Start and Projected End Dates

September, 2010 -
December, 2028

Species

Common Name

Blue Swimming Crab

Scientific Name

Portunus pelagicus

Gear Type

[Bottom Gillnet](#)

[Pot/Trap](#)

Location

FAO Major Fishing Area

[Area 71 \(Pacific, Western Central\)](#)

Exclusive Economic Zones

Country

Viet Nam

Geographic Scope

Kien Giang Province

Country Flag of Vessel

Viet Nam

Estimated Total FIP Landings

3100 metric tons

FIP Leads

Organization Name

Vietnam Association of Seafood Exporters & Producers (VASEP)

Organization Type

Industry

Primary Contact
