

Chile Central-South Araucanian herring and anchovy (Regions V-X) – purse seine

Overview

FIP Description

The Chile Central-South Araucanian herring/common sardine and anchoveta fishery targets common sardine and anchovy in Regions V-X using purse seines. This is one of the most important fisheries in Chile, providing jobs for over 100,000 people and fishmeal for farmed salmon globally. Key issues challenging this fishery include implementing an ecosystem-based approach to management as these are low trophic level species, assessing and mitigating bycatch, and reducing risk of IUU fishing.

How is this FIP Doing?

Current Status:

Actions Progress This shows the proportion of actions in the workplan that the FIP has completed.

Actions Overview This shows the proportion of actions that are behind schedule, on track, completed, or not yet started.

Behind	On Track	Complete	Future
