

Australia northern grey mackerel-gillnet (Wren Fishing PTY LTD)

Overview

FIP Description

Wren Fishing is a fishing organisation that operates three vessels in the Northern Territory's Offshore Net and Line Fishery (ONLF) and Queensland's Gulf of Carpentaria Inshore Fishery (GoCIF) that targets grey mackerel. Queensland's GoCIF is divided into several fishery symbols (Attached, and synonymous, to fishing licenses that permit fishing in a particular location and fishery), including the offshore (N12) mesh net fishery, where the vast majority of grey mackerel is landed. Wren Fishing are the sole owners and operators in the N12 fishery. The Northern Territory ONLF consists of ~10 vessels and is divided into two management regions (east and west). The Wren Fishing Fleet are the primary vessels that operate in the eastern management region and are ~1/3 of vessels that operate in the western management region.

This FIP is for Wren Fishing vessels that operate in GOCIF and ONLF, which only target grey mackerel. This mackerel is sold to north Queensland consumers

How is this FIP Doing?

Current Status:

Actions Progress This shows the proportion of actions in the workplan that the FIP has completed.

Actions Overview This shows the proportion of actions that are behind schedule, on track, completed, or not yet started.

71%

29%

0%

Red Indicator Progress This shows the proportion of actions specifically addressing red indicators that are behind schedule, on track, completed, or not yet started. This helps users understand the progress the FIP is making on the biggest challenges in the fishery.

Behind	On Track	Complete	Future
0%	50%	50%	0%

FIP Progress Rating

A - Advanced Progress

FIP Objective(s)

Wren Fishing are undertaking this FIP of their fishing operations in order to achieve MSC certification by March 2028. To achieve this Wren Fishing and their stakeholders aim to achieve 'green' scores for all 28 MSC performance indicators. A developed workplan identifies the specific actions and goals that would see all 12 performance indicators, which scored red and yellow by a MSC pre-assessment, achieve 'green' scores. The specific actions and objectives for each of the 12 performance indicators is available in 'workplan tab'. Ultimately, the goal of the FIP is address and improve all environmental challenges that have been identified by the MSC pre-assessment
