

PROSPECTIVE Mexico Tabasco red snapper - bottom longline

Overview

FIP Description

Caribbean Garden and **Deep Sea Atlantic** have partnered with **CeDePesca** to design a FIP for the red snapper - bottom longline fishery in Tabasco, Mexico.

As part of the development phase, CeDePesca will be conducting an MSC pre-assessment of the fishery to identify the main obstacles to sustainability and will propose a FIP Action Plan aimed at achieving a certifiable status for the fishery against the MSC standard.

Landings for red snapper (*Lutjanus campechanus*) in the Campeche Bank were 5144 metric tons in 2023. Out of these, 665 metric tons were landed in the state of Tabasco.

How is this FIP Doing?
