

PROSPECTIVE Indonesia Indian Ocean mahi-mahi - longline

Overview

FIP Description

The proposed Fishery Improvement Project (FIP) focuses on Indonesian longline fisheries targeting mahi-mahi, landed at multiple ports across the country. The project aims to identify opportunities to support the development of this FIP, enhancing the fishery's sustainability and social responsibility, with the ultimate goal of achieving Marine Stewardship Council (MSC) certification.

At this initial stage, key details such as the number of vessels, targeted landing ports, consultants, and stakeholder commitments are still being identified. However, PT. Fresh on Time Seafood has demonstrated its commitment to initiating the FIP.

The company remains open to collaborations that can support the advancement of this FIP to the next stage.

How is this FIP Doing?
