

Mexico Bahia de Los Angeles octopus - trap/diver-caught/hand gathered

Overview

FIP Description

An octopus FIP is being carried out in the Gulf of California, Mexico with the main objective of making the fishery sustainable. This fishery covers the region known as Bahia de Los Angeles (BLA), inside natural protected areas. The octopus fishery is the most important for the local community and the fishermen have traditionally caught the octopus by gleaning, free diving and using traps. The catch of octopus in BLA represents the 90% of the total octopus catch in Baja California State and it is a fishery with high value and great potential for commercialization.

How is this FIP Doing?

Current Status:

% of Indicators Tracked Basic FIPs may focus their workplans on a subset of the indicators. This shows the proportion of total indicators the FIP is working on.

Actions Progress This shows the proportion of actions in the workplan that the FIP has completed.

Actions Overview This shows the proportion of actions that are behind schedule, on track, completed, or not yet started.

C - Some Recent Progress

FIP Objective(s)

By the project's target end date, the FIP hopes to achieve the following:

- To improve the performance of the octopus fishery moving towards sustainability by December 2022
- To conduct participatory management of the octopus fishery by December 2022
- To perform the octopus fishery in an orderly manner by December 2022
- To maintain a basic information system for the management of the octopus fishery by June 2019
- To apply management strategies and comply with local regulations and agreements for the management of the octopus fishery by December 2022
- To have a cold chain and production processing through quality controls by December 2022
- To provide added value and open new marketing channels by December 2022
- To maintain the economic benefits of fishermen by December 2022

Stage 3: FIP Implementation

Start and Projected End Dates

January, 2018 -
December, 2022

Species

Common Name

California Two-Spot Octopus

Scientific Name

Octopus bimaculatus

Additional Names

Pulpo Café, Pulpo Lunarejo

Common Name

Hubb's Octopus

Scientific Name

Octopus hubbsorum

Additional Names

Pulpo Verde

Gear Type

[Diver-Caught](#)

[Hand Gathered](#)

[Pot/Trap](#)

Location

FAO Major Fishing Area

[Area 77 \(Pacific, Eastern Central\)](#)

Exclusive Economic Zones

Country

Mexico

Geographic Scope

Gulf of California

FIP Volume

18 metric tons
