

## INACTIVE Chile Patagonian red octopus - hookah

## Overview

## FIP Description

The FIP focuses on the Patagonian red octopus (*Enteroctopus megalocyathus*) fishery, which operates in the Los Lagos Region, where most landings are brought in. In the Los Lagos Region, landings can reach 1,000 tons per year. On the commercial side, this species competes with the common octopus (*Octopus vulgaris*) in the international market.

The present FIP proposed the following lines of action:

1. Determination of stock status and management strategy development
2. Collection of fishery-dependent data
3. Collection of fishery data for Primary, Secondary and ETP species
4. Establish Habitats and ecosystem status
5. Specific Management Development

## How is this FIP Doing?

## Current Status:

**% of Indicators Tracked** Basic FIPs may focus their workplans on a subset of the indicators. This shows the proportion of total indicators the FIP is working on.

**Actions Progress** This shows the proportion of actions in the workplan that the FIP has completed.

60%

**Actions Overview** This shows the proportion of actions that are behind schedule, on track, completed, or not yet started.

Behind	On Track	Complete	Future
40%	0%	60%	0%

#### FIP Objective(s)

Develop a Management Plan, in accordance with MSC Principles 1 and 2, by January 2023.

#### FIP Type

Basic

#### FIP Stage

Stage 5: Improvements on the Water

#### Start and Projected End Dates

October, 2018 -  
January, 2023

#### Species

##### Common Name

Red Octopus

##### Scientific Name

Enteroctopus megalocyathus

#### Gear Type

[Diver-Caught](#)

#### Location

##### FAO Major Fishing Area

[Area 87 \(Pacific, Southeast\)](#)

##### Exclusive Economic Zones

**Country**

Chile

**Geographic Scope**

Los Lagos Region

**Regional Fisheries Management Organization (RFMO)****High Seas Name**

Pacific Ocean

**Estimated Total FIP Landings**

514 metric tons
