Dear Namibian Maritime and Fisheries Institute,

We are writing to extend a call for dialog as a major global seafood producer/supplier. We understand the importance of maintaining open and constructive communication between seafood producers and regulatory authorities, and we believe that a dialogue between our organizations would be highly beneficial.

At FCF, we are committed to providing high-quality, sustainably sourced seafood products to our customers around the world. As a global leader in the seafood industry, we are deeply committed to ensuring the safety and quality of our products and to promoting sustainable and responsible practices throughout the industry. We do this through Fishery Improvement Projects and pushing vessels towards obtaining MSC certification, including our work with Namibian flagged fishing vessels.

To find more information on the present FIP please view the [FisheryProgress profile here](#).

The fisheries aim to meet the rising global demand for tuna in a sustainable manner by assuring catches do not exceed sustainable levels, promoting the ecosystem based approach to fisheries management and strengthening policy and governance systems in the Pacific ocean.

We believe that our organizations share a common goal of promoting the growth and development of the seafood industry in Namibia while ensuring the safety and quality of seafood products. We would be pleased to have the opportunity to engage in a constructive and productive dialog with your organization to achieve this goal.

We look forward to hearing from you and to the opportunity to work together.

Sincerely,

Tom Evans – FIP Manager on behalf of FCF
