Indonesia Blue Swimming Crab Processors Association (APRI)

Dear Sirs,

The NFI Crab Council member companies have agreed to implement the Control Document system beginning on July 1, 2018. Member companies have been advised that a letter of warrant should be executed with all of their Indonesian suppliers of blue swimming crab by that date. We have also asked our member companies to provide the Crab Council with copies of the signed letters of warrant. Our companies are aware that their Indonesian suppliers must also execute letters of warrant with their suppliers at levels of the supply chain.

We recognize and appreciate the hard work by APRI that has taken us to this important point. We also know that the months following the implementation date will require additional effort to ensure the Control Document system is effective. We look forward to working with you to guarantee its success.

Sincerely,

A handwritten signature in black ink, appearing to read "G. Gibbons", is positioned below the word "Sincerely,".

Gavin Gibbons
