

RESTOCKING ACTIVITIES IN EAST JAVA PROVINCE WITH HANDY SEAFOOD INC. AND AGENCY OF FISHERIES OF SITUBONDO

February 2025

Thursday, February 27, 2025. APRI, Handy Seafood Inc., and Agency of Fisheries of Situbondo carried out a restocking activity in Situbondo, East Java. Crablets size 2-4 cm are released into the wild, expected to be able to develop and provide a positive impact by providing many benefits, especially to the community. Thousands of crablets released on seagrass area to increase the survival of the crablets. Seagrass area itself, based on the restocking and monitoring before, able to provides a place that more suitable for crablets to survive. This activity was attended by APRI, representatives from the Handy Seafood Inc., a company which is a member of APRI and representatives from the Agency of Fisheries of Situbondo. It is hoped that the crablets are able to survive and enhance the blue swimming crab stock.
