Hi Hilario and Gala,

Thank you both for coming back.

I have copied American American Aparejos in this email. Could you please liaise directly with them regarding your outreach program.

Kind Regards
Youssef

Hi Youssef,

Gala is right. MSC does not approved/certified fishing gears/methods.

We can explain this to them with more detail during the outreach Gala mentioned.

Cheers,
Hilario

Hi Youssef,

I don't think MSC will conduct this task. However, JP or Hilario will better know it.

In ISSF we've planned to outreach FAD manufacturers to share with them what we consider what a NE FAD or bioFAD is.

Perhaps JP and Hilario can add to this email what they know
Best,

Gala Moreno

Hi Gala,

I hope you are keeping well.

American Aparejos have developed non entangling FADs and they want to get them approved by MSC. is there such a thing and is this something you can help with.

thanks in advance for your assistance.

Kind Regards

Youssef

Youssef bonjour,

America a termine ses DCP bio. elle voudrait maintenant les faire certifier MSC; peux tu m'indiquer la marche à suivre pour que la passe. merci d'avance, et à très bientôt.

A plus
