Hi Renae,  
Yes, that is my understanding.

Paul

**Subject:** Lobster FIP Question

Hi Paul,

Under the action items for our Lobster FIP for 'qualify other lobster removals outside of standard reporting system' and 'verify SARA (ETP) species information reporting', we have updated our FIP to say that DFO Regional Conservation and Protection have given increased priority to logbook reporting and catch verification in 2022-2023, as well as logbook reporting should also include any catch of SARA species? Can you confirm that to be case?

Thanks,  
Renae
