

ASOSIASI PENGELOLAAN RAJUNGAN INDONESIA INDONESIAN BLUE SWIMMING CRAB ASSOCIATION

ENUMERATOR TRAINING

Updated September 2023

APRI holds enumerator and community organizer training activities to continue to increase data collection capacity and field knowledge. The 2-day activity on April 14 and 18 2023 was led directly by APRI's Research and Executive Director, Dr. Ayu Ervinia. Also present were the General Manager of FIP Implementation of APRI, M. Bagus Satria, APRI FIP & Co-Management Coordinator, M Wijdan Taqiyuddin, and APRI Report & Publication Coordinator, Dicky Darmawan, as well as 12 enumerators and community organizers in 10 APRI management areas spread throughout Indonesia. The first day of training opened with a presentation of material about the introduction of the Indonesian Blue Swimming Crab Fishery Improvement Program (FIP-APRI) by M. Bagus Satria. Continued in the second session with a presentation of material on the Biology and NTS Data Collection Guide by Dr. Ayu Ervinia. The second day the material was more in-depth and focused on Mangrove and Seagrass Habitat Observations presented by M. Wijdan Taqiyuddin, and continued in the second session with a presentation on Ghost Fishing Clean Up and Coastal Clean Up by Dicky Darmawan. Enumerators and community organizers used this activity as a means of discussion and sharing experiences experienced during data collection and management in their respective locations as an effort to have a positive impact on crab fisheries in Indonesia.
