

FISHERIES STAKEHOLDER DATA COLLECTION MEETING September 2024

On 20 September 2024, taking place in Bogor, Dr. Ayu Ervinia as Research and Executive Director of APRI was present at the data collection meeting for fisheries stakeholders in 2024. APRI as FIP implementer continues to collect data related to blue swimming crab commodities. The important role of data collection as a step in sustainable management of crab fisheries is very important. Fisheries stakeholder data collection is carried out to strengthen the accuracy of capture fisheries statistical data collection. This is done so that fisheries resource management can be carried out better. Activities carried out at Luminor Hotel Bogor together with the Central Statistics Agency (BPS) and various related stakeholders. Collected data such as the type, number and location of fishing are important in formulating policies for sustainable fisheries by the Ministry of Marine Affairs and Fisheries Directorate of Capture Fisheries.
