Task 2.1. Contribute to the compliance of FIP partners and their suppliers with current regulations

Advances

March 2020

Activities

- The Quality Assurance Policy was modified in order to include a Sustainability Section.

QUALITY ASSURANCE POLICY

SUSTAINABILITY SECTION

In Pescados y Mariscos del Caribe S.A. de C.V. (PESMAR), We are committed to the Management System with the aim of:

- To produce safe, innocuous, good quality and sustainable marine fishery products.
- Strengthen the relationship with loyal and reliable suppliers, through the purchase of raw materials in accordance with national and international regulations.
- Fulfill the requirements of our clients, the final consumer and the regulations that allow the continuity of our business and care for the environment.
- Establish and analyze our objectives of safety and continuous improvement.

Sustainability Section Policy

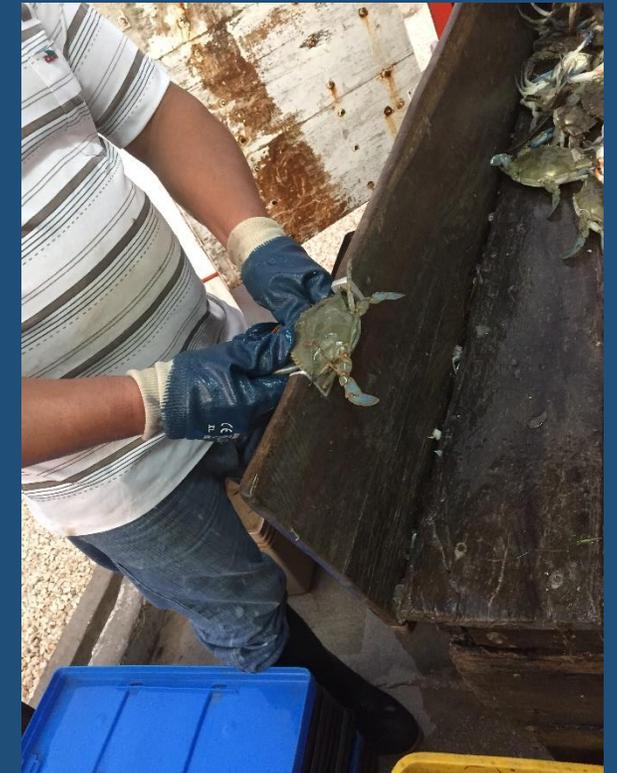

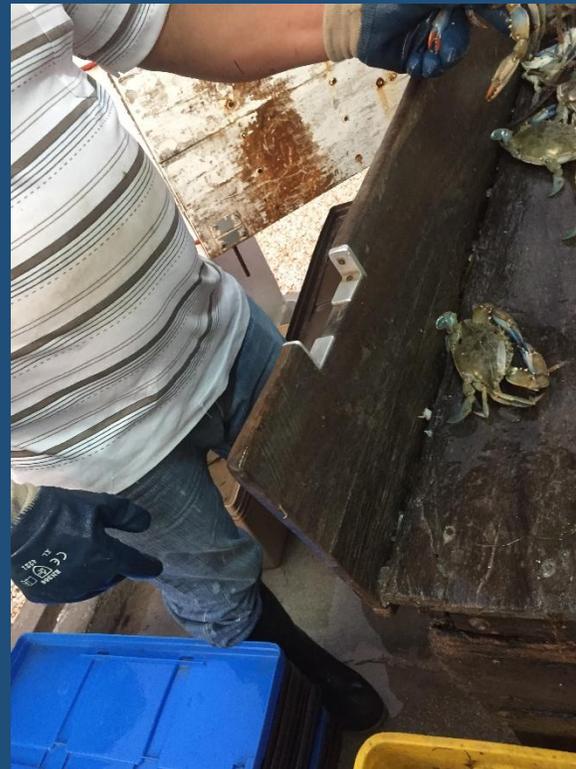

- The Purchase Policy is presented to fishermen and permit holders & collaborators in order to promote compliance.

Compliance with minimum legal size

- Our Reception Tables in the Reception Center & the Processing Plant include notches sized as the minimum legal size where compliance can be verified easily.

Legal fishing gear

*** bottles are used as floating devices
