9	Closing of the Workshop	02:35 pm - 02:50 pm

Workshop description: Participatory Workshop with Artisanal Skipjack Fishermen in Puerto Angel Oaxaca 2024.	Approximate time: 4-5 hours
--	-----------------------------

OBJECTIVES: To develop, in a participatory manner with local fishermen, a Responsible Fishing Code for the artisanal skipjack fishery in Puerto Ángel, Oaxaca, which promotes the sustainability of marine resources, and strengthens responsible fishing practices through the joint planning of corrective measures and proposals for improvement.

Theme	Goals	Technique/ Activity	Description	Material	Time	Responsible
Registration and Welcome	Register and meet the group you will be working with	Welcome words	Registration of participants Presentation of FOCN and the fishing coordinator. Presentation of location/age/cooperative/main economic activity.	-	20 min	Lourdes/Ephraim/Alice
Workshop Introduction and Objectives	Presentation and Induction to workshop objectives	Expository	Presentation of the workshop and its objectives What do you expect from the workshop/learn from the workshop? Presentation of topics to be worked on <ul style="list-style-type: none"> Importance of a Responsible Fishing Code 	Computer	20 min	Ephraim/Alice
Context of the Skipjack	To present and discuss recent monitoring results (2022-2023) to	Practice	Presentation of the diagnosis of the artisanal skipjack fishery in Puerto Angel 22-23 (monitoring results) *Importance of	Computer/white sheets	40 minutes	Ephraim/Alice

Fishery in Puerto Angel	understand the current status of the skipjack fishery, its challenges, and opportunities for improvement.		fishermen's participation/photographs of their participation. Possible markets and a timeline. activity: Identification of fishing practices used within the skipjack fishery through a dynamic/game (e.g. series of drawings) Discussion of current practices and their positive and negative impacts.			
Food/Snack	Refreshment		Food consumption for workshop participants.		35 minutes	Workshop participants
Development of the Responsible Fishing Code (Part 1)	To review traditional and modern fishing techniques used to capture skipjack, identifying both their positive and negative impacts on natural resources.		Presentation of examples of responsible fishing codes from other regions (FAO, Nicaraguan fishing code, tropicalized to the area). Discussion on best practices applicable to Puerto Angel. Correct use, positive practices that have been forgotten (they stopped being used).	Computer/white sheets	65 minutes	Efraín/Alicia , Workshop participants.
BREAK _ Optional	Activation/bath		Bathroom break	Coffee break	10 min	
Development of the Responsible Fishing Code (Part 2)	Collectively develop proposals for the Responsible Fishing Code: Facilitate dialogue among participants to define	Collaborate in code development	Group work: Proposals for the Responsible Fishing Code in the local context of Puerto Angel, Oaxaca.	Computer/white sheets/markers /bond paper.	1 hour	Efraín/Alicia , Workshop participants.

	good practices that should be implemented, adjusted to local reality, and in line with sustainability and the conservation of marine biodiversity.		Presentation of proposals and discussion in plenary. Note down those that are agreed upon during the workshop.			
Implementation Planning and Training	Define the actions necessary for the implementation of the code, identify required resources, and organize future training to ensure its effective application by skipjack fishermen.	Plan the implementation and monitoring of the Code	Assigning responsibilities for implementation (asking for volunteers). Suggestions on the type of material they recommend (catalog, sign, brochures, small descriptive book) and where educational materials and practical guides could be established or posted (palapas, piers, flyers).	Computer/white sheets/markers/bond paper.	25 minutes	Efrain/Alicia, Workshop Participants
Closing of the Workshop		Clear up doubts and close the workshop	Brief summary of results and next steps Closing words and thanks.	Computer	15 minutes	Efrain/Alicia, Workshop Participants

Materials and Tools

- **Computer equipment and software programs:** For data processing and report creation.
- **Office supplies:** Bond paper, crayons, markers, pens, white sheets.
- **Digital materials:** Videos and presentations for fishermen's information.
