Hello Tom,

First, I thank you for the data that you have shared, we shall update you on the analysis and output.

With regards to the DNA samples, only the extraction of DNA has been completed and is of high quality. We now need to go sequence the samples and conduct an in-depth analysis. I shall ask the colleague in charge of that to give a caption or paragraph for the website.

Regards,

\*\*\*\*\*

Hi Nina,

A quick additional, do we have any proof of the genetic sample work we have done in Beira that I could share on the FIP website to prove we have done it?

Thanks a lot,

Tom
