

Dos and Don'ts reference list for tuna vessel skippers and crew

Vessel Name: 金維益十六 JIN JINN YI Na+?

| DO | DON'T |
|---|---|
| eLOGSHEET/LOGBOOK | |
| Record what bait type is used | Ignore bycatch information record |
| Record any harvest discard during operation, including release individuals | Forget to record the released status of releasing animals |
| Record number of hooks in set | |
| SHARKS | |
| Record ALL shark catches. If there are zero catches, record zeros to make it clear that there is nothing to report | Leave fields empty. |
| Follow the fins naturally attached policy | Cut the fins off the bodies of sharks |
| Be able to distinguish Endangered, Threatened and Protected (ETP) and harvestable shark species | |
| Apply appropriate measures to release ETP sharks. Remove all gear (including hooks) from sharks if possible. If hooks cannot be safely removed, leave them in place and remove as much line as possible (keep line > 1 m) | Immobilise sharks (including through electric shock or blows to the head) to remove hooks. Cut away sharks with long piece of line still attached |
| Release all ETP sharks | Retain ETP sharks or associated fins |
| ENDANGERED, THREATENED, AND PROTECTED (ETP) SPECIES BYCATCH | |
| Handle any ETP bycatch carefully, follow without risking crew safety. | Immobilise any animal through blows to the head or the like. Treat all animals as gently as possible without risking crew safety |
| Report all ETP (turtle, seabird, cetacean) bycatch, species and record fate (released alive, dead injured) | If there are zero catches, record zeros |
| Understand international/national measures/regulations to mitigate/resolve ETP bycatch issues | Keep the ETP interaction record in blank |
| TURTLE BYCATCH | |
| Record all turtle bycatch and fate | |
| Lift net to lift turtles aboard | Lift turtles onto the deck by the line. Only use a net |

| | |
|--|---|
| Keep turtles on deck, in a cool place with a wet towel to protect them, until they recover their strength and can be returned to the water | Return turtles that are weak back to the water |
| Use dehooker or line cutter to free turtles in water whenever possible | Apply wrong approaches on handle turtle |
| SEABIRD BYCATCH | |
| Record all seabird bycatch and fate | |
| Record which 2 out of the specified 3 measures for seabird bycatch mitigation are being used for EACH SET, if fishing below 25S | Catch seabird deliberately |
| If using a tori line, deploy before hooks are set, and retrieve only after ending hook setting | Keep seabird bycatch column in blank (if zero bycatch then put on '0') |
| If using night setting, set ALL hooks at night - from nautical dusk to nautical dawn | Set lines into the morning - doing so means night setting was not used. There is no 'partial night setting' allowed |
| Use weights close to the hook (refer to CMM for detailed specifications) | |
| MARPOL ANNEX 5, AND GHOST GEAR | |
| Record any lost gear (total hooks and mainline lengths) | |
| Record any fishing gear that is found during operations | |
| Retain all plastic waste onboard or incinerate it if safe to do so | Discard any plastic, including fishing line and packaging straps at sea |

| | | | | | | |

| Record which 2 out of the specified 3 measures for seabird bycatch mitigation are being used for EACH SET, if fishing below 25S | Catch seabird deliberately |
| If using a tori line, deploy before hooks are set, and retrieve only after ending hook setting | Keep seabird bycatch column in blank (if zero bycatch then put on '0') |
| If using night setting, set ALL hooks at night - from nautical dusk to nautical dawn | Set lines into the morning - doing so means night setting was not used. There is no 'partial night setting' allowed |
| Use weights close to the hook (refer to CMM for detailed specifications) | |
| MARPOL ANNEX 5, AND GHOST GEAR | |
| Record any lost gear (total hooks and mainline lengths) | |
| Record any fishing gear that is found during operations | |
| Retain all plastic waste onboard or incinerate it if safe to do so | Discard any plastic, including fishing line and packaging straps at sea |

Dos and Don'ts reference list for tuna vessel skippers and crew

Vessel Name: 金進益 828号

JIN JIN YI NO: 828号

| DO | DON'T |
|---|---|
| eLOGSHEET/LOGBOOK | |
| Record what bait type is used | Ignore bycatch information record |
| Record any harvest discard during operation, including release individuals | Forget to record the released status of releasing animals |
| Record number of hooks in set | |
| SHARKS | |
| Record ALL shark catches. If there are zero catches, record zeros to make it clear that there is nothing to report | Leave fields empty. |
| Follow the fins naturally attached policy | Cut the fins off the bodies of sharks |
| Be able to distinguish Endangered, Threatened and Protected (ETP) and harvestable shark species | |
| Apply appropriate measures to release ETP sharks. Remove all gear (including hooks) from sharks if possible. If hooks cannot be safely removed, leave them in place and remove as much line as possible (keep line > 1 m) | Immobilise sharks (including through electric shock or blows to the head) to remove hooks. Cut away sharks with long piece of line still attached |
| Release all ETP sharks | Retain ETP sharks or associated fins |
| ENDANGERED, THREATENED, AND PROTECTED (ETP) SPECIES BYCATCH | |
| Handle any ETP bycatch carefully, follow without risking crew safety. | Immobilise any animal through blows to the head or the like. Treat all animals as gently as possible without risking crew safety |
| Report all ETP (turtle, seabird, cetacean) bycatch, by species and record fate (released alive, dead or injured) | If there are zero catches, record zeros |
| Understand international/national measures/regulations to mitigate/resolve ETP bycatch issues | Keep the ETP interaction record in blank |
| TURTLE BYCATCH | |
| Record all turtle bycatch and fate | |
| Use net to lift turtles aboard | Lift turtles onto the deck by the line. Only ever use a net |

| | |
|--|---|
| Keep turtles on deck, in a cool place with a wet towel to protect them, until they recover their strength and can be returned to the water | Return turtles that are weak back to the water |
| Use dehooker or line cutter to free turtles in water whenever possible | Apply wrong approaches on handle turtle |
| SEABIRD BYCATCH | |
| Record all seabird bycatch and fate | |
| Record which 2 out of the specified 3 measures for seabird bycatch mitigation are being used for EACH SET, if fishing below 25S | Catch seabird deliberately |
| If using a tori line, deploy before hooks are set, and retrieve only after ending hook setting | Keep seabird bycatch column in blank (if zero bycatch then put on '0') |
| If using night setting, set ALL hooks at night - from nautical dusk to nautical dawn | Set lines into the morning - doing so means night setting was not used. There is no 'partial night setting' allowed |
| Use weights close to the hook (refer to CMM for detailed specifications) | |
| MARPOL ANNEX 5, AND GHOST GEAR | |
| Record any lost gear (total hooks and mainline lengths) | |
| Record any fishing gear that is found during operations | |
| Retain all plastic waste onboard or incinerate it if possible to do so | Discard any plastic, including fishing line and packaging straps at sea |
