

Mahi-Mahi Tagging Project

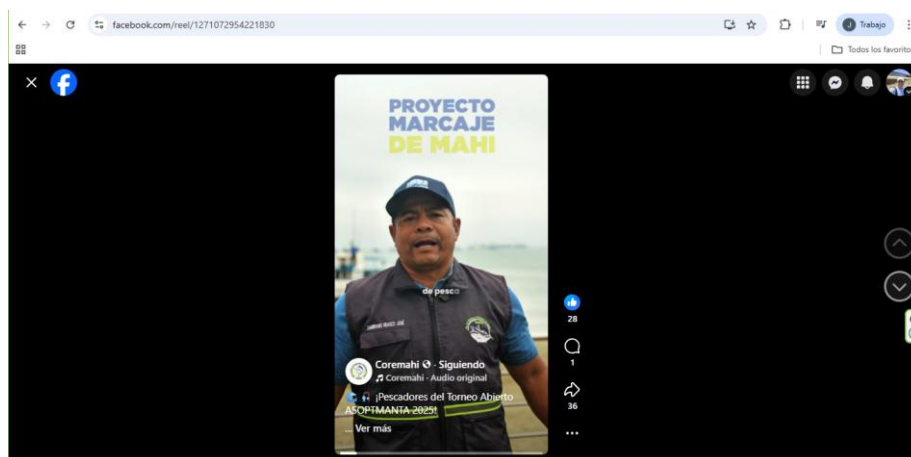

During the second half of 2025, the FIP has continued to promote the tagging project with the support of captains and crew members from longline vessels who took part in the Oceanic Fishing Tournament organized by the “Asociación de Patronos y Timoneles de Manta (ASOPTMANTA),” who are partners of the mahi-mahi FIP led by ASOAMAN. Finally, with support from subject-matter experts, as well as scientists from IPIAP and IMARPE, a final report is being prepared on the tags deployed from 2023 to 2025 and the tags recovered from recaptured mahi-mahi. The final report is expected to be ready in December 2025, and a scientific publication based on the study is planned for 2026. In addition, an animated explanatory video was developed so that fishers who find tagged mahi-mahi can report it properly. All of these actions have been carried out with the logistical and financial support of the Regional Committee of Mahi Producers and Processors (COREMAHI), of which ASOAMAN is a member.
