

## RESTOCKING ACTIVITIES IN EAST JAVA PROVINCE WITH STAKEHOLDERS

August 2025

August 26, 2025 – In a joint effort to support blue swimming crab stock, Asosiasi Pengelola Rajungan Indonesia (APRI) in collaboration with Honest Crab by Crabcraze, has conducted a restocking activity for blue swimming crabs. The restocking activity took place along the coastal waters of Situbondo, East Java, where juvenile crabs were released back into their natural habitat to help restore wild stocks and support the sustainability of one of Indonesia's best fishery commodities. This initiative reflects the shared commitment of industry and stakeholders to marine conservation, responsible resource procurement, and the long-term health of coastal ecosystems. It also strengthens the role of private sector actors in supporting environmental management and sustainable fisheries practices.
