**Table 2. Areas available for oyster replenishment and restoration activity for the 2025 Oyster Replenishment Plan.**

- Notes:**
- The cost estimate is based on average estimated price of \$4 per bushel for shell, \$8 per bushel equivalent of stone, and \$12 per bushel for seed and may include both seed and shell in some locations.
  - These are average prices based on a range of work that has been conducted in the past, the price paid will vary depending on location and the size of the project.
  - The average markets and Brown Shell Volume are derived from the annual VIMS/VMRC Joint oyster assessment survey.
  - Areas are targeted based on criteria outlined in the ORP that include brown shell volume and open harvest status, this incorporates the input of SMAC and the Commission.
