35. Rex To-ong
36. Joseph Rusiana

- 37. Keven Lloyd Dipay
- 38. Joel John Nunez
- 39. Rosanna Contreras

Meeting Objective:

The objective of the meeting is to discuss measures to strengthen traceability systems and coordination mechanisms to address Illegal, Unreported, and Unregulated (IUU) fishing in Sarangani Province and Sultan Kudarat. The meeting will present and discuss the key findings of the EU audit, including identified gaps and recommended actions. It will also review proposed amendments to the guidelines for the Traceability System for Fish and Fishery Products in the Philippines, as well as a discussion of the process flow, documentation, and reportorial requirements for Catch Validation to support clear and consistent implementation.

Meeting Highlights:

1. The Division Chief of RFIQU, Mr. Eugene M. Casas, delivered the opening remarks, emphasizing the high-priority nature of the coordination meeting. He acknowledged the significant contribution of municipal fishing vessels in supplying fresh tuna to processing plants serving European Union (EU) markets. He also raised key concerns regarding the findings of the EU audit, particularly on the designation of Catch Validation personnel in Sarangani Province and Sultan Kudarat.
2. Mr. Eugene Casas, Chief of RFIQU, facilitated a consultation on the consistency of ordinances and the enforcement of sanctions, during which concerns were raised regarding existing BFAR resolutions and guidance. The discussion also covered issues on the registration and renewal of municipal bancas, particularly the conflicting validity of municipal fishing vessels in Sarangani Province. As a resolution, Ms. Zenaida Dangalan of PFO Sarangani recommended elevating the concern to the concerned local government units (LGUs). Mr. Casas further suggested consolidating and validating the list of municipal fishing vessels and coordinating with the LGUs, which have jurisdiction over municipal bancas.
3. A follow-up question was raised regarding the registration and renewal of municipal bancas, specifically on the possibility of advancing the renewal period. In response, Ms. Zenaida of PFO Sarangani clarified that BFAR has no authority to intervene in the renewal of municipal bancas, as jurisdiction over this matter rests with the local government units (LGUs). She recommended that the concern be elevated to the concerned LGUs. Ms. Rosanna Contreras further suggested that the PFO or BFAR formally communicate this issue to the LGUs through a written correspondence, highlighting the challenges faced by fishers in renewing their bancas. She also emphasized that vessels without valid licenses may be classified as engaging in Illegal, Unreported, and Unregulated Fishing (IUUF), which has implications for traceability and raises concerns on the sourcing of fish by processing plants. This is particularly critical in ensuring that fish are not sourced from IUUF vessels.

4. Another question was raised on whether the local government units (LGUs) of Sarangani Province and Sultan Kudarat are fully aware of the catch validation requirements in each municipality. In response, Mr. Eugene Casas assured the participants that BFAR will coordinate with the concerned LGUs by setting appointments and conducting visits to organize the matter, including the reassignment of BFAR personnel in their respective areas.
5. Mr. Eugene Casas emphasized that no Local Transport Permit (LTP) will be issued at the municipal level to avoid competition in the issuance of Auxiliary Invoices. He clarified that Catch Validation (CV) will only require a certification signed by the concerned personnel to confirm that the vessel has been properly validated. This matter will be raised during meetings with the LGUs. He further noted that a checkpoint team will be stationed at the entrance of the General Santos Fishport, where the requirements for fish transport will include the Catch Validation certification and the corresponding Auxiliary Invoice.
6. Mr. Eugene Casas also provided an update that BFAR Region XII has already conducted training for Mati personnel. He noted that he will seek further updates on the status of Mati's Catch Validation Team, particularly on whether the team has already been formally established and on any issues related to catch validation in Mati.
7. A question was raised on whether the Official Receipt (OR) issued for the registration or renewal of municipal bancas can be considered a valid vessel license. It was clarified that the OR does not constitute an official license and therefore cannot serve as proof of vessel licensing. This presents a compliance concern, as the European Union requires the submission of the vessel license number, not the OR number.
8. The deployment of Catch Validation personnel in Sarangani Province and Sultan Kudarat was also discussed. Mr. Eugene Casas assured the participants that the assigned Catch Validation personnel are properly trained and will provide assistance to vessel captains and fisherfolk in addressing their concerns.
9. It was noted that a meeting will be scheduled with the Philippine Fisheries Development Authority (PFDA) to encourage brokers, suppliers, and buyers to actively participate in meetings and activities conducted by BFAR.

Action Items and Implementation:

BFAR–RFIQU, together with Municipal and City Coordinators, will conduct orientations and meetings with the local government units (LGUs) of Sarangani Province and Sultan Kudarat. In addition, a coordination meeting with the Philippine Fisheries Development Authority (PFDA) will be organized to engage brokers, suppliers, and buyers and encourage their active participation in meetings conducted by BFAR–RFIQU.

BFAR ADMINISTRATIVE CIRCULAR No. 251 -1 SERIES OF 2019

Whereas, the Philippines, as a member of Food and Agriculture Organization that endorsed the 2001 International Plan of Action to prevent, deter and eliminate Illegal, Unregulated and Unreported Fishing (IU

Bureau of Fisheries and Aquatic Resources Region 12

SECTION 3. SCOPE

3.1 This Circular establishes the traceability system for wild-caught and farmed fish and other aquatic Products. It covers the following business operations that make up their respective supply chain:

Bureau of Fisheries and Aquatic Resources Region 12

SECTION 3. SCOPE

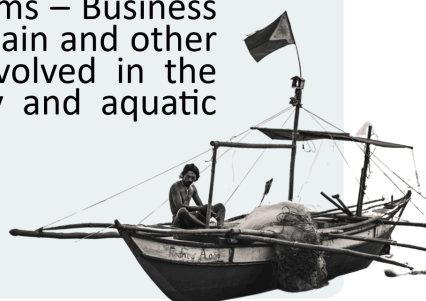

3.2 This Circular shall apply to all **FAPOs and business**

SECTION 4. RESPONSIBILITIES OF BUSINESS OPERATORS

4.6 Registration and Traceability Systems – Business operator involved in the fish supply chain and other than FABOs, directly or indirectly involved in the production and processing of fishery and aquatic products are required to:

SECTION 4. RESPONSIBILITIES OF BUSINESS OPERATORS

a. Register with the Competent Authority; and

b. *Create, update and maintain records needed to determine the immediate previous sources and the immediate subsequent recipients of FA products in order to allow the Competent Authority to address credible threats to or adverse consequences on human, animal, plant life or health as well as on the environment, and to enable the Competent Authority to prevent market entry of IUUF-derived products.*

SECTION 6. RESPONSIBILITIES OF THE COMPETENT AUTHORITY

SECTION 8. SANCTIONS

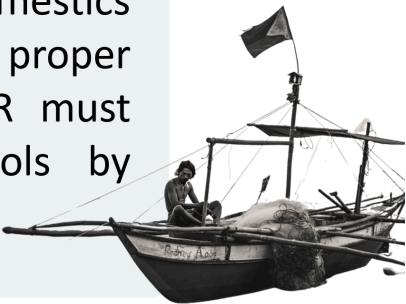

FABOs or registered business operators who fail to respond to any request for records by the Competent Authority or fail to comply with any provisions of this Circular shall be subject to administrative sanctions such as but not limited to: non-issuance of catch certificates or sanitary/ health certificates, suspension of imports for three months for the first offense, suspension of imports or exports for six months for the second offense; suspension of pertinent registration for six months for third offense; and revocation of pertinent registration for the fourth offense.

AUDIT FINDINGS

In early 2023 after EU audit they found out that fish catch weights from domestics vessels were being recorded without proper supervision. They advised that BFAR must strenghten fish landing site controls by reinforcing the catch validators team.

The deployment of Catch Validators is a critical step in strengthening the traceability system for Fish and Fishery Products in SARANGANI and Sultan Kudarat.

By deploying catch validators/quarantine personnel, BFAR XII aims to reinforce the traceability system and aid in the fight against Illegal, Unreported, and Unregulated (IUU) fishing, which remains a significant challenge that undermines the sustainability of fisheries resources and the livelihoods of local fishing communities.

The planned deployment of catch validators and quarantine personnel to the coastal municipalities of Sarangani Province and Sultan Kudarat is a strategic step to address these gaps.

Thank you!

September 20, 2025

Dir. Usop D. Pendaliday Jr.
Regional Director
Bureau of Fisheries & Aquatic Resources – Region XII
General Santos City

Dear Sir:

Good day!

Rugela Fishing Industries, Incorporated would like to inform your good office that we will be unloading from the following carrier vessel/s on the following date/s:

Unloading Date	Carrier/Vessel	Volume (Est.)	Area
September 21, 2025	F/B Master Rustin 4	14 tons	F/B Lady Evelyn 8
		23 tons	F/B Lady Evelyn 8

In line with this, we would like to request for a catch validation on the said date/s. Market 3, General Santos City Fishport Complex.

Thank you.

Sincerely,

GRACE D. MACEDA
Superior

Application

**Tuna Handline
Municipal Vessel**

- Validate upon the Request of Liaison or Captain

Application

Tuna Handline/ Purse Seine Commercial Vessel

- Validate upon Arrival (early in the morning)
- But some company can also make an appointment for the validation of their company vessel

- Submit a letter of request for inspection from the fishing company informing the BFAR – Catch validation of the arrival of their vessel.

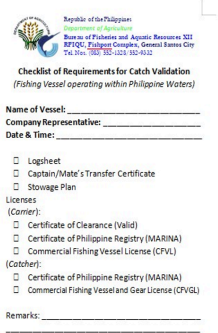

Validation

Catch validator prepares inspection tools and materials to bring on board to undertake inspection activity.

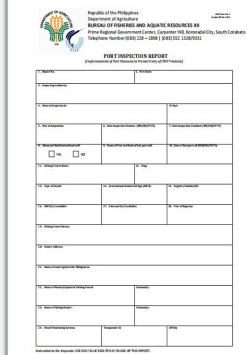

Complete & Proper Uniform

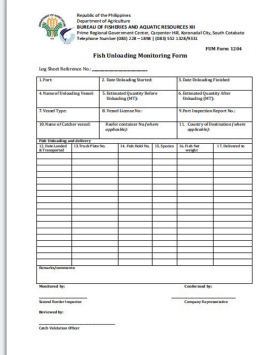

Verification checklists

Fish Unloading Monitoring Form

Catch Validation Requirements

Tuna Handline Municipal Vessel

- Registration of Pump Boats
- Permit to Operate
- Stowage Plan
- Simplified Fish Catch

Tuna Handline Commercial Vessel

- Certificate of Fishing Vessel License (CFVL)
- Certificate of Clearance
- Logsheet
- Stowage Plan

Purse Seine Commercial Vessel (Domestic)

- Certificate of Fishing Vessel License (CFVL)
- Certificate of Clearance
- Logsheet
- Stowage Plan
- Captain's Mate Transfer Cert.

No markings of Fishing Vessel
NO VALIDATION

Lack of Documents
NO CERTIFICATION

Catcher Padala:

- Transhipment Certificate
- Certificate of Fishing Vessel License (CFVL)
- Logsheet
- Stowage Plan

(additional Requirement for High Seas)

- Distant Water Fishing Permit (DWFP)- carrier/catcher
- Special Fishing Permit- (SFP) catcher only
