

Activity Report:

Installation of ALON VMS to Municipal and Commercial Vessels Enrolled Under the FIP and Training on the ALON System

Date: October 13-14, 2025

Venue: Kablacan, Maasim, Sarangani Province | Gensan Fishport Market 1, General Santos City

Participants:

The activity was attended by a total of 36 participants, composed of 6 motormen, 8 boat captains, 15 crew members, 3 representatives from the General Santos City LGU, 2 fishing company representatives, and 2 installers.

Activity Objective:

The objective of the activity was to strengthen vessel monitoring, traceability, and safety at sea by installing ALON tracking units on selected municipal and commercial handline vessels and training vessel owners, captains, and crew members on their proper use and maintenance. It aimed to promote the adoption of digital monitoring tools, including NFC cards for recording fishing trips, and to enhance compliance with fisheries management requirements.

Activity Highlights:

1. The training and orientation on the ALON vessel tracking system were conducted for vessel owners, captains, crew members, and other stakeholders to enhance their understanding of the system's operation and purpose.
2. A total of 18 handline vessels comprising 9 municipal and 9 commercial boats were successfully installed with ALON tracking units.
3. Each ALON unit was provided with 10 NFC cards to be used by crew members for recording and monitoring of their catch.
4. The training included demonstrations of system features, such as vessel tracking, safety alerts, and data reporting functions.
5. Participants were guided on the proper operation, maintenance, and troubleshooting of the ALON units.
6. The installation team conducted onboard mounting, configuration, and testing to ensure each unit was functional and transmitting data properly.
