

# The summary of Dos and Don'ts reference list for tuna vessel skippers and crew

*Danggan, Taiwan July 02nd, 2025*

*Prepared by Kevin Lin, Ocean Outcomes*

## Introduction

On 2nd July 2025, Kevin Lin conducted interviews with the captain of **Yi Feng No.681**, [Wang Shun Ji], This document presents a summary of the discussions held with the captain. To confirm his/their full understanding of the questions and the accuracy of his/their responses in relation to the condition of his/their vessels, the captain agreed to answer the questions we asked.

## eologsheet/Logbook

|   |  |
|---|--|
| Record what bait type is used 餌料  | Sardines, Muroaji                                |
| Record any harvest discard during operation, including release individuals 紀錄漁獲拋棄 | Yes, mostly sharks, blue sharks and silky sharks |
| Record number of hooks in set 鉤數  | <2500 (around 2400)                              |

## Sharks

|   |     |
|---|-----|
| Record ALL shark catches. If there are zero catches, record zeros to make it clear that there is nothing to report  | Yes |
| Follow the fins naturally attached policy   | Yes |
| Be able to distinguish Endangered, Threatened and Protected (ETP) and harvestable shark species   | Yes |
| Apply appropriate measures to release ETP sharks. Remove all gear (including hooks) from sharks if possible, If hooks cannot be safely removed, leave them in place and remove as much line as possible (keep line > 1 m) | Yes |

|                        |     |
|------------------------|-----|
| Release all ETP sharks | Yes |
|------------------------|-----|

## ETP Species Bycatch

|  |   |
|--|---|
| Handle any ETP bycatch carefully, follow without risking crew safety.  | yes   |
| Report all ETP (turtle, seabird, cetacean) bycatch, by species and record fate (released alive, dead or injured) | Seldom encounter ETP species. However the captain did record the fate of ETP species. |
| Understand international/national measures/regulations to mitigate/resolve ETP bycatch issues                    | yes   |

## Turtle Bycatch

|  |                         |
|--|-------------------------|
| Record all turtle bycatch and fate   | Yes                     |
| Use net to lift turtles aboard   | Yes                     |
| Keep turtles on deck, in a cool place with a wet towel to protect them, until they recover their strength and can be returned to the water | No. It's not practical. |
| Use dehooker or line cutter to free turtles in water whenever possible   | Yes                     |

## Seabird Bycatch

|   |   |
|---|---|
| Record all seabird bycatch and fate   | Yes, but they seldom encountered seabirds at fishing. |
| Record which 2 out of the specified 3 measures for seabird bycatch mitigation are being used for EACH SET, if fishing below 25S | Yes   |
| If using a tori line, deploy before hooks are set, and retrieve only after ending hook setting                                  | Yes   |

|  |     |
|--|-----|
| If using night setting, set ALL hooks at night - from nautical dusk to nautical dawn | No  |
| Use weights close to the hook (refer to CMM for detailed specifications)             | Yes |

## Marpol Annex 5m and Ghost Gear mitigation measures

|  |     |
|--|-----|
| Record any lost gear (total hooks and mainline lengths)            | No  |
| Record any fishing gear that is found during operations            | No  |
| Retain all plastic waste onboard or incinerate it if safe to do so | No. |

# The summary of Dos and Don'ts reference list for tuna vessel skippers and crew

*Danggan, Taiwan July 02nd, 2025*

*Prepared by Kevin Lin, Ocean Outcomes*

## Introduction

On 2nd July 2025, Kevin Lin conducted interviews with the captain of **Yi Feng No.682**, [Tien, Guang Yun], This document presents a summary of the discussions held with the captain. To confirm his/their full understanding of the questions and the accuracy of his/their responses in relation to the condition of his/their vessels, the captain agreed to answer the questions we asked.

## eologsheet/Logbook

|   |  |
|---|--|
| Record what bait type is used 餌料  | Sardines, Muroaji                                |
| Record any harvest discard during operation, including release individuals 紀錄漁獲拋棄 | Yes, mostly sharks, blue sharks and silky sharks |
| Record number of hooks in set 鉤數  | <2500 (around 2400)                              |

## Sharks

|   |     |
|---|-----|
| Record ALL shark catches. If there are zero catches, record zeros to make it clear that there is nothing to report  | Yes |
| Follow the fins naturally attached policy   | Yes |
| Be able to distinguish Endangered, Threatened and Protected (ETP) and harvestable shark species   | Yes |
| Apply appropriate measures to release ETP sharks. Remove all gear (including hooks) from sharks if possible, If hooks cannot be safely removed, leave them in place and remove as much line as possible (keep line > 1 m) | Yes |

|                        |     |
|------------------------|-----|
| Release all ETP sharks | Yes |
|------------------------|-----|

## ETP Species Bycatch

|  |   |
|--|---|
| Handle any ETP bycatch carefully, follow without risking crew safety.  | yes   |
| Report all ETP (turtle, seabird, cetacean) bycatch, by species and record fate (released alive, dead or injured) | Seldom encounter ETP species. However the captain did record the fate of ETP species. |
| Understand international/national measures/regulations to mitigate/resolve ETP bycatch issues                    | yes   |

## Turtle Bycatch

|  |                         |
|--|-------------------------|
| Record all turtle bycatch and fate   | Yes                     |
| Use net to lift turtles aboard   | Yes                     |
| Keep turtles on deck, in a cool place with a wet towel to protect them, until they recover their strength and can be returned to the water | No. It's not practical. |
| Use dehooker or line cutter to free turtles in water whenever possible   | Yes                     |

## Seabird Bycatch

|   |   |
|---|---|
| Record all seabird bycatch and fate   | Yes, but they seldom encountered seabirds at fishing. |
| Record which 2 out of the specified 3 measures for seabird bycatch mitigation are being used for EACH SET, if fishing below 25S | Yes   |
| If using a tori line, deploy before hooks are set, and retrieve only after ending hook setting                                  | Yes   |

|  |     |
|--|-----|
| If using night setting, set ALL hooks at night - from nautical dusk to nautical dawn | No  |
| Use weights close to the hook (refer to CMM for detailed specifications)             | Yes |

## Marpol Annex 5m and Ghost Gear mitigation measures

|  |     |
|--|-----|
| Record any lost gear (total hooks and mainline lengths)            | No  |
| Record any fishing gear that is found during operations            | No  |
| Retain all plastic waste onboard or incinerate it if safe to do so | No. |

# The summary of Dos and Don'ts reference list for tuna vessel skippers and crew

*Danggan, Taiwan July 11th, 2025*

*Prepared by Kevin Lin, Ocean Outcomes*

## Introduction

On 11th July 2025, Kevin Lin conducted interviews with the captain of **Jin Ming Cai No.6**, [Tsai, Fong Chi], This document presents a summary of the discussions held with the captain. To confirm his/their full understanding of the questions and the accuracy of his/their responses in relation to the condition of his/their vessels, the captain agreed to answer the questions we asked.

## elogsheet/Logbook

|   |   |
|---|---|
| Record what bait type is used 餌料  | Sardines-like bait (Sardinella zunasi)                |
| Record any harvest discard during operation, including release individuals 紀錄漁獲拋棄 | Yes, mostly sharks, white-tip sharks and silky sharks |
| Record number of hooks in set 鉤數  | Around 1800   |

## Sharks

|   |   |
|---|---|
| Record ALL shark catches. If there are zero catches, record zeros to make it clear that there is nothing to report  | Yes - the vessel is in the seasonal shark catching group - only catches legally catchable sharks and follows strict FNA policy. |
| Follow the fins naturally attached policy   | Yes   |
| Be able to distinguish Endangered, Threatened and Protected (ETP) and harvestable shark species   | Yes   |
| Apply appropriate measures to release ETP sharks. Remove all gear (including hooks) from sharks if possible, If hooks cannot be safely removed, leave them in place and remove as much line as possible (keep line > 1 m) | Yes   |

|                        |     |
|------------------------|-----|
| Release all ETP sharks | Yes |
|------------------------|-----|

## ETP Species Bycatch

|  |   |
|--|---|
| Handle any ETP bycatch carefully, follow without risking crew safety.  | yes   |
| Report all ETP (turtle, seabird, cetacean) bycatch, by species and record fate (released alive, dead or injured) | Seldom encounter ETP species. However the captain did record the fate of ETP species. |
| Understand international/national measures/regulations to mitigate/resolve ETP bycatch issues                    | yes   |

## Turtle Bycatch

|  |                         |
|--|-------------------------|
| Record all turtle bycatch and fate   | Yes                     |
| Use net to lift turtles aboard   | Yes                     |
| Keep turtles on deck, in a cool place with a wet towel to protect them, until they recover their strength and can be returned to the water | No. It's not practical. |
| Use dehooker or line cutter to free turtles in water whenever possible   | Yes                     |

## Seabird Bycatch

|   |   |
|---|---|
| Record all seabird bycatch and fate   | Yes, but they seldom encountered seabirds at fishing. |
| Record which 2 out of the specified 3 measures for seabird bycatch mitigation are being used for EACH SET, if fishing below 25S | Yes   |
| If using a tori line, deploy before hooks are set, and retrieve only after ending hook setting                                  | Yes   |

|  |     |
|--|-----|
| If using night setting, set ALL hooks at night - from nautical dusk to nautical dawn | No  |
| Use weights close to the hook (refer to CMM for detailed specifications)             | Yes |

## Marpol Annex 5m and Ghost Gear mitigation measures

|  |     |
|--|-----|
| Record any lost gear (total hooks and mainline lengths)            | No  |
| Record any fishing gear that is found during operations            | No  |
| Retain all plastic waste onboard or incinerate it if safe to do so | No. |

# The summary of Dos and Don'ts reference list for tuna vessel skippers and crew

*Pago Pago, American Samoa September 17th, 2025*

*Prepared by Kevin Lin, Ocean Outcomes*

## Introduction

On 17th September 2025, Kevin Lin conducted interviews with the captain of **YU LONG FA NO.22**, [Captain Zheng], This document presents a summary of the discussions held with the captain. To confirm his/their full understanding of the questions and the accuracy of his/their responses in relation to the condition of his/their vessels, the captain agreed to answer the questions we asked.

## elogsheet/Logbook

|   |   |
|---|---|
| Record what bait type is used 餌料  | Sardines-like bait (Sardinella zunasi)                |
| Record any harvest discard during operation, including release individuals 紀錄漁獲拋棄 | Yes, mostly sharks, white-tip sharks and silky sharks |
| Record number of hooks in set 鉤數  | Around 2550   |

## Sharks

|   |     |
|---|-----|
| Record ALL shark catches. If there are zero catches, record zeros to make it clear that there is nothing to report  | Yes |
| Follow the fins naturally attached policy   | Yes |
| Be able to distinguish Endangered, Threatened and Protected (ETP) and harvestable shark species   | Yes |
| Apply appropriate measures to release ETP sharks. Remove all gear (including hooks) from sharks if possible, If hooks cannot be safely removed, leave them in place and remove as much line as possible (keep line > 1 m) | Yes |

|                        |     |
|------------------------|-----|
| Release all ETP sharks | Yes |
|------------------------|-----|

## ETP Species Bycatch

|  |   |
|--|---|
| Handle any ETP bycatch carefully, follow without risking crew safety.  | yes   |
| Report all ETP (turtle, seabird, cetacean) bycatch, by species and record fate (released alive, dead or injured) | Seldom encounter ETP species. However the captain did record the fate of ETP species. |
| Understand international/national measures/regulations to mitigate/resolve ETP bycatch issues                    | yes   |

## Turtle Bycatch

|  |   |
|--|---|
| Record all turtle bycatch and fate   | Yes   |
| Use net to lift turtles aboard   | Yes   |
| Keep turtles on deck, in a cool place with a wet towel to protect them, until they recover their strength and can be returned to the water | No. It's not practical and seldom encountered such species. |
| Use dehooker or line cutter to free turtles in water whenever possible   | Yes   |

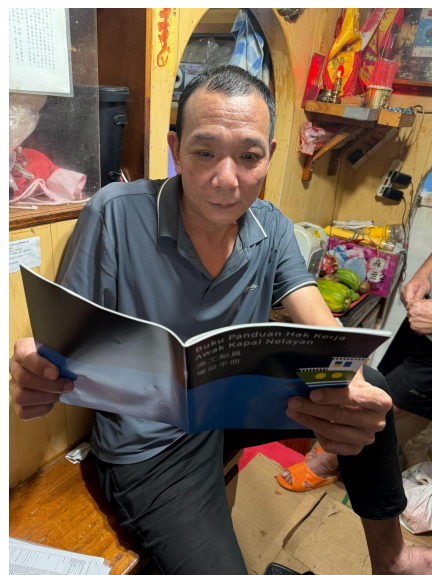

## Seabird Bycatch

|   |   |
|---|---|
| Record all seabird bycatch and fate   | Yes, but they seldom encountered seabirds at fishing. |
| Record which 2 out of the specified 3 measures for seabird bycatch mitigation are being used for EACH SET, if fishing below 25S | Yes   |
| If using a tori line, deploy before hooks are set, and retrieve only after ending hook setting                                  | Yes   |

|  |     |
|--|-----|
| If using night setting, set ALL hooks at night - from nautical dusk to nautical dawn | No  |
| Use weights close to the hook (refer to CMM for detailed specifications)             | Yes |

## Marpol Annex 5m and Ghost Gear mitigation measures

|  |     |
|--|-----|
| Record any lost gear (total hooks and mainline lengths)            | No  |
| Record any fishing gear that is found during operations            | No  |
| Retain all plastic waste onboard or incinerate it if safe to do so | No. |

# The summary of Dos and Don'ts reference list for tuna vessel skippers and crew

*Pago Pago, American Samoa September 17th, 2025*

*Prepared by Kevin Lin, Ocean Outcomes*

## Introduction

On 17th September 2025, Kevin Lin conducted interviews with the captain of **YU LONG FA NO.36**, [Captain Liu], This document presents a summary of the discussions held with the captain. To confirm his/their full understanding of the questions and the accuracy of his/their responses in relation to the condition of his/their vessels, the captain agreed to answer the questions we asked.

## elogsheet/Logbook

|   |   |
|---|---|
| Record what bait type is used 餌料  | Sardines-like bait (Sardinella zunasi)                |
| Record any harvest discard during operation, including release individuals 紀錄漁獲拋棄 | Yes, mostly sharks, white-tip sharks and silky sharks |
| Record number of hooks in set 鉤數  | Around 2800   |

## Sharks

|   |     |
|---|-----|
| Record ALL shark catches. If there are zero catches, record zeros to make it clear that there is nothing to report  | Yes |
| Follow the fins naturally attached policy   | Yes |
| Be able to distinguish Endangered, Threatened and Protected (ETP) and harvestable shark species   | Yes |
| Apply appropriate measures to release ETP sharks. Remove all gear (including hooks) from sharks if possible, If hooks cannot be safely removed, leave them in place and remove as much line as possible (keep line > 1 m) | Yes |

|                        |     |
|------------------------|-----|
| Release all ETP sharks | Yes |
|------------------------|-----|

## ETP Species Bycatch

|  |   |
|--|---|
| Handle any ETP bycatch carefully, follow without risking crew safety.  | yes   |
| Report all ETP (turtle, seabird, cetacean) bycatch, by species and record fate (released alive, dead or injured) | Seldom encounter ETP species. However the captain did record the fate of ETP species. |
| Understand international/national measures/regulations to mitigate/resolve ETP bycatch issues                    | yes   |

## Turtle Bycatch

|  |   |
|--|---|
| Record all turtle bycatch and fate   | Yes   |
| Use net to lift turtles aboard   | Yes   |
| Keep turtles on deck, in a cool place with a wet towel to protect them, until they recover their strength and can be returned to the water | No. It's not practical and seldom encountered such species. |
| Use dehooker or line cutter to free turtles in water whenever possible   | Yes   |

## Seabird Bycatch

|   |   |
|---|---|
| Record all seabird bycatch and fate   | Yes, but they seldom encountered seabirds at fishing. |
| Record which 2 out of the specified 3 measures for seabird bycatch mitigation are being used for EACH SET, if fishing below 25S | Yes   |
| If using a tori line, deploy before hooks are set, and retrieve only after ending hook setting                                  | Yes   |

|  |     |
|--|-----|
| If using night setting, set ALL hooks at night - from nautical dusk to nautical dawn | No  |
| Use weights close to the hook (refer to CMM for detailed specifications)             | Yes |

## Marpol Annex 5m and Ghost Gear mitigation measures

|  |     |
|--|-----|
| Record any lost gear (total hooks and mainline lengths)            | No  |
| Record any fishing gear that is found during operations            | No  |
| Retain all plastic waste onboard or incinerate it if safe to do so | No. |

# The summary of Dos and Don'ts reference list for tuna vessel skippers and crew

*Pago Pago, American Samoa September 17th, 2025*

| Use weights close to the hook (refer to CMM for detailed specifications)             | Yes |

## Marpol Annex 5m and Ghost Gear mitigation measures

|  |     |
|--|-----|
| Record any lost gear (total hooks and mainline lengths)            | No  |
| Record any fishing gear that is found during operations            | No  |
| Retain all plastic waste onboard or incinerate it if safe to do so | No. |

# The summary of Dos and Don'ts reference list for tuna vessel skippers and crew

*Pago Pago, American Samoa September 18th, 2025*

*Prepared by Kevin Lin, Ocean Outcomes*

## Introduction

On 18th September 2025, Kevin Lin conducted interviews with the captain of **SHIN JAAN SHIN NO.7**, [Captain Lee], This document presents a summary of the discussions held with the captain. To confirm his/their full understanding of the questions and the accuracy of his/their responses in relation to the condition of his/their vessels, the captain agreed to answer the questions we asked.

## elogsheet/Logbook

|   |   |
|---|---|
| Record what bait type is used 餌料  | Sardines-like bait (Sardinella zunasi)                |
| Record any harvest discard during operation, including release individuals 紀錄漁獲拋棄 | Yes, mostly sharks, white-tip sharks and silky sharks |
| Record number of hooks in set 鈎數  | Around 2500~2800                                      |

## Sharks

|   |     |
|---|-----|
| Record ALL shark catches. If there are zero catches, record zeros to make it clear that there is nothing to report  | Yes |
| Follow the fins naturally attached policy   | Yes |
| Be able to distinguish Endangered, Threatened and Protected (ETP) and harvestable shark species   | Yes |
| Apply appropriate measures to release ETP sharks. Remove all gear (including hooks) from sharks if possible, If hooks cannot be safely removed, leave them in place and remove as much line as possible (keep line > 1 m) | Yes |

|                        |     |
|------------------------|-----|
| Release all ETP sharks | Yes |
|------------------------|-----|

## ETP Species Bycatch

|  |   |
|--|---|
| Handle any ETP bycatch carefully, follow without risking crew safety.  | yes   |
| Report all ETP (turtle, seabird, cetacean) bycatch, by species and record fate (released alive, dead or injured) | Seldom encounter ETP species. However the captain did record the fate of ETP species. |
| Understand international/national measures/regulations to mitigate/resolve ETP bycatch issues                    | yes   |

## Turtle Bycatch

|  |   |
|--|---|
| Record all turtle bycatch and fate   | Yes   |
| Use net to lift turtles aboard   | Yes   |
| Keep turtles on deck, in a cool place with a wet towel to protect them, until they recover their strength and can be returned to the water | No. It's not practical and seldom encountered such species. |
| Use dehooker or line cutter to free turtles in water whenever possible   | Yes   |

## Seabird Bycatch

|   |   |
|---|---|
| Record all seabird bycatch and fate   | Yes, but they seldom encountered seabirds at fishing. |
| Record which 2 out of the specified 3 measures for seabird bycatch mitigation are being used for EACH SET, if fishing below 25S | Yes   |
| If using a tori line, deploy before hooks are set, and retrieve only after ending hook setting                                  | Yes   |

|  |     |
|--|-----|
| If using night setting, set ALL hooks at night - from nautical dusk to nautical dawn | No  |
| Use weights close to the hook (refer to CMM for detailed specifications)             | Yes |

## Marpol Annex 5m and Ghost Gear mitigation measures

|  |     |
|--|-----|
| Record any lost gear (total hooks and mainline lengths)            | No  |
| Record any fishing gear that is found during operations            | No  |
| Retain all plastic waste onboard or incinerate it if safe to do so | No. |
